

PLAFORAD N

Suspended metal ceiling panels with hidden support structures

The modular elements are manufactured with a large variety of models, shapes and size that allow unlimited possibilities of style and combinations.

The panels are available in smooth or micro-perforated surface

The interspaces containing the various technological plants can easily be inspected thanks to opening panels: they rotate towards the bottom and remain connected to the structure by means of wires or safety springs.

3 Plaforad N series are available:

Series N with opening panels

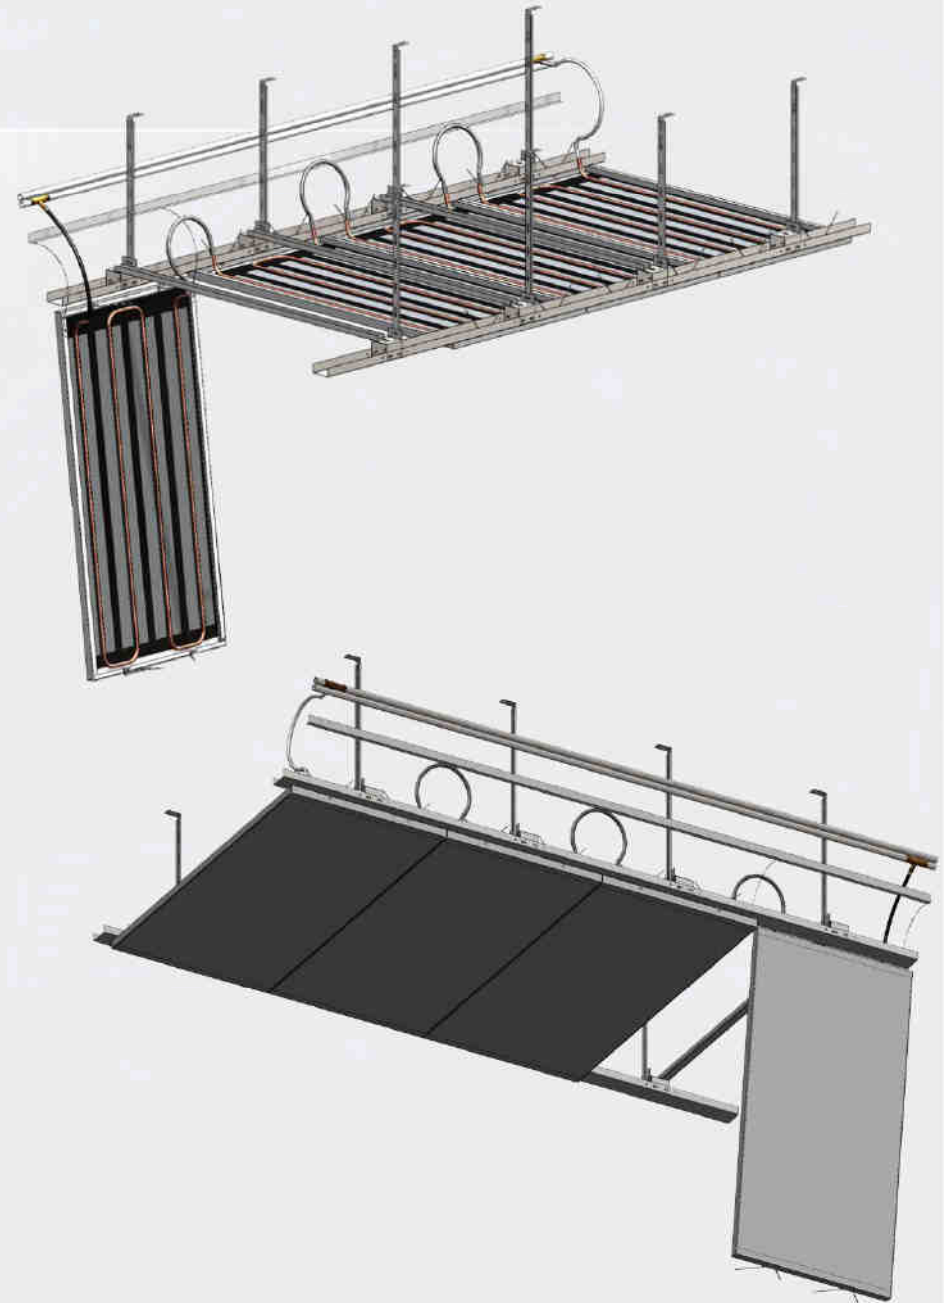

Serie N-E: the panels cannot be opened but dismantled

Serie N-T: the panels can be dismantled but they are sealed with the use of special seals, providing optimal closure for those environments where a high level of hygiene is required like hospitals, medical centres, medical laboratories, health farms, spas, etc.

The maximum dimensions of these panels is width 600 mm x 2000 mm in length

Standard colours RAL9003 (white) and RAL9006 (silver) Other colours available upon request

The panels are certified and tested in compliance with EN 14037, EN 14240 and EN15377
