

# PLAFORAD V

## Suspended metal radiant ceiling panels with supporting structures in full view

Standard designed with sound-proof micro-perforated panels

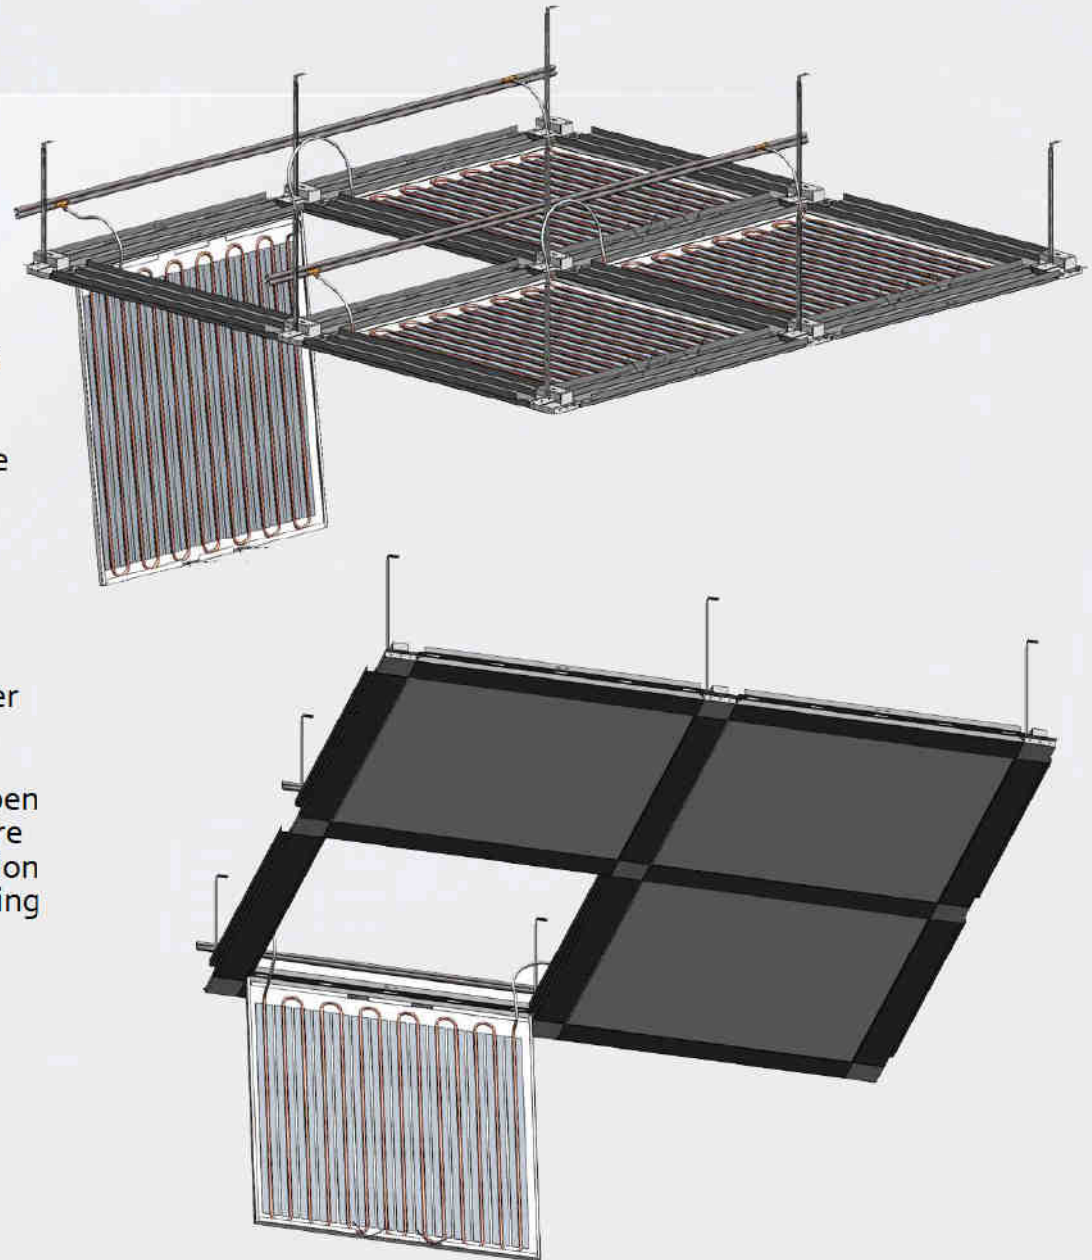

Available as :

- supporting structure in cross version having standard square panels 1350 x 1350 mm (other configurations are available on demand)
- supporting structure in parallel version having standard panels 1350 x 596 mm (other configurations are available on demand)

Standard colours RAL 9003 (white) and RAL9006 (silver). Other colours available upon request

Plaforad V ceilings are composed of integrated panels that open downwards remaining hooked to the supporting structure by means of bayonet joints and wire springs. Such solution allows an easy access to inspect the interspaces containing the technological plants of a modern design system

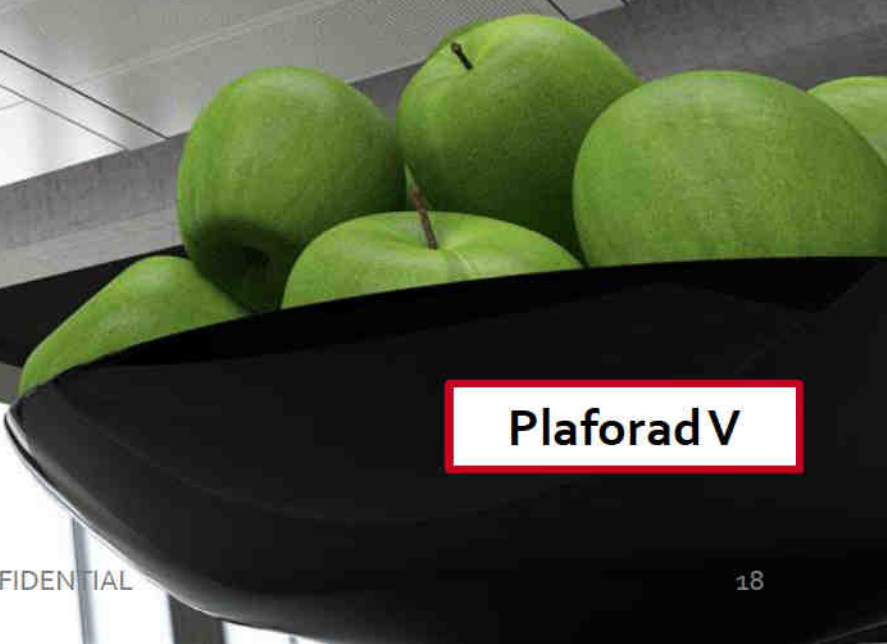

The panels are certified and tested in compliance with EN 14037, EN 14240 and EN 15377.
